

The opening in the figure is a manual door, and the placement of the internal speakers is for reference

Manually isolation Box

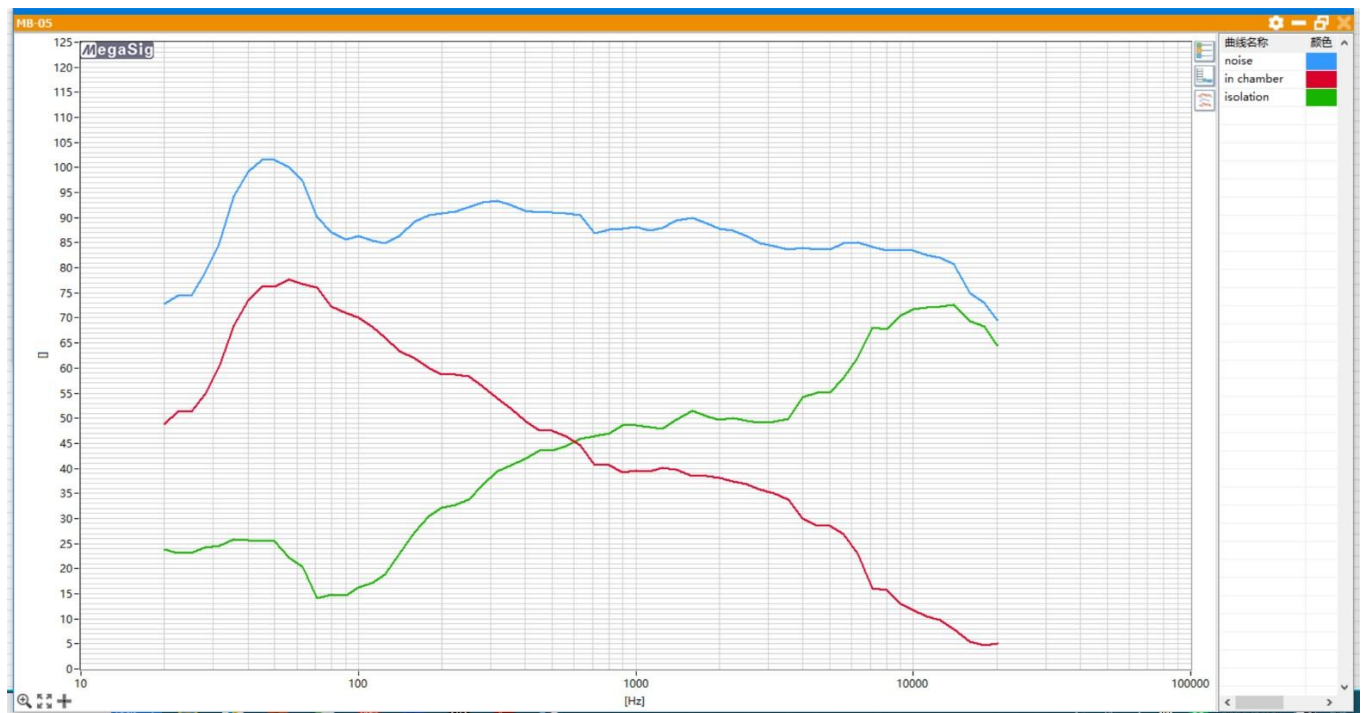

MB Series is a noise elimination box specially designed for audio testing in consumer electronics laboratories. It can effectively isolate environmental noise, and effectively prevent reflection and reverberation in the box, providing a stable and reliable acoustic environment for audio testing of products.

Product Parameters

Connector Group (Customizable)	
BNC Connector Group	2 set
MB 05 Basic Parameters	
External dimension	1400mm*1000mm*1700mm
Internal dimension	1140*740*940mm
Isolation	Refer to the following typical curves for different frequency isolation:

Advantage

- Resonance microporous plate and glass fiber are used on the inner surface to achieve the sound absorption effect of sponge, which will not be easily damaged like sponge after long-term use.
- Better isolation
